# ABOUT LETABA PUMPS

Letaba Pumps was founded in 1992 and is a renowned name in the industrial pumps and dewatering solutions sector, synonymous with excellence and reliability.

As market leaders in satisfying the water transfer needs of construction, earthmoving, mining and industrial clients, we've established a solid reputation for delivering top-notch fluid transfer solutions and international-standard pump brands for both hire and purchase.

We pride ourselves on our commitment to exceptional after-sales service.

Our Johannesburg warehouse serves as the hub of our client-centric approach. Branches in Rustenburg, Steelpoort and Zimbabwe; combined with our nationwide dealer and reseller network, ensure that we can meet your needs, regardless of your location.

We offer comprehensive support, from sales distribution to expertly maintained rentals, easy maintenance, and rapid access to spare parts.

At Letaba Pumps, we're driven by a dual passion for service excellence and top-tier products. By nurturing long-term partnerships with our clients and suppliers, we ensure that our solutions exceed expectations, every time.

Our extensive range of retail and rental products features specialized, internationally acclaimed pumps across various categories, including Wilden Air Operated Diaphragm Pumps, Self-Priming Pumps, Magdrive Pumps, Sakuragawa Submersible Pumps, and more.

Trust Letaba Pumps for unparalleled expertise and quality.

## INDUSTRIES SERVED:

Chemical  
Water and Waste Water  
Mining – Ferrous and Non-Ferrous  
Food and Beverage  
Oil and Petrochemical  
Power Utility  
Paper and Pulp  
Bio Gas

# WILDEN

## AIR OPERATED DIAPHRAGM PUMPS

We specialise in the supply of Wilden Air-Operated Double Diaphragm Pumps in Southern Africa.

We cover all aspects of maintenance, process applications and pump selection. Our warehouse facility offers extensive stock holding, plus our experienced national dealer network supports all distribution.

### GENERAL PERAMETERS:

Performance Data Pump sizes: 1/4" (6mm) - 4" (100mm)  
Solids capacity: 6mm - 76mm  
Flow rates: 0 - 1000 lpm  
Heads: 0.1 Bar - 19 Bar

### ACCESSORIES

We offer a wide range of accessories. Give us a call and we can fulfill all your pumping and pumping accessory needs under one roof.

#### Accessories include:

- Surge Dampeners
- Electronic accessories such as leak detection devices and pump cycle monitors
- Drum Pump Kits

# SAKURAGAWA

## SUBMERSIBLE PUMPS

Sakuragawa submersible drainage pumps enjoy world-wide acclaim based on their comprehensive range of reliable, robustly manufactured products, produced in their new state of the art facility at Fukui, Japan.

Experience gained over a fifty-year period in diverse industries, is reflected in the product range which can be found operating successfully in the following applications:

- MINING:** Open cast and Deep Operations Drainage
- INDUSTRIAL:** Recirculation, Waste Water, etc.
- MARINE:** Dry Dock Ship Services and Facilities
- AGRICULTURE:** Irrigation, Narrow Wells and Tight Trenches
- CONSTRUCTION:** Manholes, Tunnels, Site drainage, etc.

### ACCESSORIES

The following accessories are also available:

- Agitators
- Mixers
- Float switches
- Control panels
- Fittings & Quick Couplings
- Synthetic or Rubber Hoses
- Zinc anodes

# LETABA PUMPS KWENA

## WET PRIME SELF PRIMING PUMPS

### Introducing Kwena Wet Prime Pumps: Efficient, Reliable, and Durable

Welcome to Kwena Wet Prime Pumps, the ultimate solution for your fluid handling needs. Our pumps are designed to deliver exceptional performance, reliability, and durability in the most demanding applications.

#### Key Features:

- Wet prime design for efficient priming and minimal downtime
- High-capacity pumping for industrial, municipal, and agricultural use
- Durable construction with robust materials and wear-resistant components
- Advanced seal design for reduced maintenance and extended lifespan
- Customizable configurations to meet specific application requirements

#### Benefits:

- Increased efficiency and productivity
- Reduced maintenance costs and downtime
- Enhanced reliability and consistency
- Improved safety and environmental protection
- Expert support and service
- Interchangeable with other leading OEM's

# LETABA PUMPS KUBU

## VACUUM ASSISTED SELF PRIMING PUMPS

### Letaba Mighty Kubu Range:

Revolutionizing Fluid Transfer with Vacuum-Assisted Self-Priming Pumps

## Features and Benefits

#### Environmentally Safe:

No water is required for priming, reducing wastewater and minimizing the risk of contamination.

#### Increased Efficiency:

Vacuum-assisted self-priming technology enables faster startup and reduced downtime.

#### Reduced Maintenance:

Fewer components and no seal replacement needed, resulting in lower maintenance costs.

#### Versatility:

Suitable for various industries, including chemical processing, oil and gas, mining, and more.

#### Size Range:

4" - 42"

#### Configurations:

Bareshaft, Skid Units, Trailer Units - Diesel and Electric

# LETABA MAGNETIC DRIVE PUMPS

## INDUSTRIES SERVED

Chemical, petrochemical, pharmaceutical, paper mills, textile industry, food processing, sugar plants, dairies, electronics, water treatment or any hazardous chemical applications.

**Locally Manufactured**

**SERIES:** T-SERIES (PLASTIC LINED), BMC (FULL STAINLESS STEEL), H-SERIES (FULL STAINLESS STEEL), MAGFLO (PLASTIC)

## DESIGN FEATURES

Local Manufacture = Economical Pricing

Local Manufacture = quick turn around time

Seal-less Design = Zero leakage, Environmentally friendly

No Mechanical Seal or Gland Packing

High Quality Internal Bearings

Heavy Wall Construction - Polypropylene, PVDF or 316 ST/ST

Fitted with locally available standard electric motors

Special Materials available for complex chemicals

# LETABA PUMPS RENTAL

## No capital outlay

Renting from Letaba pumps releases capital that you would otherwise spend on non-income generating pump equipment.

## Lower maintenance costs

Letaba Pumps' rental offshoot eliminates the additional and or hidden costs of pump ownership, such as artisan labour costs, training, maintenance and spares.

## Eliminates need for stand-by pumps

Needed for emergencies for example floods and breakdowns. In the unlikely event that the Letaba rental pump fails, our staff will deliver a replacement pump - 365 days a year.

## Lower incidence of production loss

Pit flooding is a major cause of production loss. Letaba Pumps are able to respond immediately with the equipment to address and avert a crisis.

## Flexibility to adapt

Letaba Pumps' rental offering allows you the flexibility to swap pumps when necessary, particularly in environments where the pump requirements are ever changing.

## Free expert advice

Through our rental fleet, we have the capacity to pump over 100 million litres of water, out of open cast mines, daily. We pass on our vast experience and knowledge in dewatering techniques to our customers to save them money.

# BA HOSE PUMPS

## BA SERIES PUMPS

Pump With Confidence

The BRUBIN BA Series peristaltic hose pump can handle your toughest pumping needs – from abrasive and aggressive fluids to sheer sensitive and viscous materials.

Seal free design eliminates leaks and contamination. Fluids are contained within the hose. The hose is the primary maintenance component.

The BRUBIN Series pump is self-priming to 25.5 ft. (9 meters) manometric lift. This pump is able to run dry continuously without detrimental effects. The pump is capable of running in forward or reverse.

For the hose inner layers, 6 materials are available to suit the diversity of the pumped fluids:

- NR > Natural Rubber (White marking)
- NBR > Buna (Yellow marking)
- NBR Food\* approved FDA >Buna (White and Yellow marking)
- EPDM (Red marking)
- Hypalon\* (Blue marking)
- VITON/FKM\* (Purple marking)

\*Any other hose material requirements available on request
